The Grass is Always Greener at El Cajon Valley High School

After months of extensive infrastructure upgrades and repair work at El Cajon Valley High, many areas around campus have been restored to their former charm. Landscape restoration has been completed a month ahead of schedule and lush grass, comfortable benches and convenient paths now invite students to take a break from their studies on campus.

Staff and students are delighted with the beautiful landscape restoration. Elsewhere on campus, mature oak trees and a new flag pole were added to complete the "pride of ownership" feeling at the Home of the Braves.

"The excitement generated by recent campus improvements is astounding. Students and staff are full of pride for their school."

- Paul Dautremont
Principal
El Cajon Valley High

Mount Miguel Roofs Reach New Heights of Technology

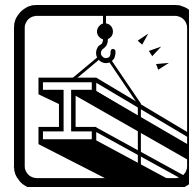

Several Mount Miguel High School roofs are currently being replaced with the innovative and energy saving technology of Saranfil™ materials. Meeting Title 24 requirements, the re-roofing projects are slated for completion by mid-December. On deck for MMHS are surveillance cameras and gym bleachers. Matador Pride is everywhere!

Upgrading the Work Training Center

The hard work and training that takes place at the Work Training Center is now a little easier at the newly renovated and ADA compliant campus. Staff and student bathrooms were upgraded to accommodate individuals with special needs. An automated front entry door allows for easier access to the one-of-a-kind facility in the Grossmont Union High School District. Watch the District find solutions that work for all members of the Grossmont family!

Erickson-Hall Construction

Erickson-Hall Construction Co. is the Construction Manager for the Grossmont District's Proposition H Program - one of several firms that are successfully assisting the GUHSD with facilitating Proposition H.

The Erickson-Hall Construction team's specialties include schools, churches, military, recreation, life-safety, modernization, and site development projects. They have a vested interest in our communities, our schools and our children's education.

Mat Gates, Construction Manager at Erickson-Hall reports, "We bring to the Prop H Program the experience and expertise necessary to modernize the sites with minimal impact to the educational process."

The breadth of Erickson-Hall's K-12 experience is specifically with modernization and new construction additions. During the course of construction, Erickson-Hall is able to manage work while facilities remain operational with minimum of disruption.
